PROFILE SUMMARY

Fresh Graduate from Universitas AMIKOM Yogyakarta, Computer Engineering Program, with interest in Artificial Intelligence, Automation, Data Analytics, Web Development, and Multimedia Technology. Skilled in developing technology-based solutions, data processing, Python programming, API integration, website management, and digital content creation. Experienced in developing AI Automation projects, WordPress-based website optimization, data analysis, and digital media production.

TECHNICAL SKILLS

Computer Troubleshooting, Hardware & Software Maintenance, Computer Networking, Windows/Linux, Python, SQL, Database Management, AI Automation, API Integration, n8n, WordPress, HTML/CSS, SEO, UI/UX Design, Graphic Design, Video Editing.

WORK EXPERIENCE & PROJECTS

SEO (Search Engine Optimization)

- Conducted keyword research, competitor analysis, and content optimization based on Search Engine Optimization (SEO) strategies.
- Managed and updated website content using WordPress, including page settings, articles, media, and website structure.
- Performed on-page SEO optimization such as meta title, meta description, heading structure, internal linking, and content quality improvement.
- Analyzed website performance using SEO tools and website analytics to identify opportunities for organic traffic growth.

Project AI Automation Customer Service

- Developed an Artificial Intelligence (AI)-based customer service system to automate communication processes with customers.
- Created workflow automation using n8n to connect various services and process user requests automatically.
- Integrated AI models with chatbot systems to understand user questions and provide relevant responses.
- Configured API integration to connect the chatbot with communication platforms and other supporting services.

EDUCATION
